EDITOR-IN-CHIEF Peter L. Hammer, Piscataway (NJ)

ADVISORY EDITORS

E. Balas, Pittsburgh (PA)	V.L. Klee, Seattle (WA)
C. Berge, Paris	D.J. Kleitman, Cambridge (MA)
G.B. Dantzig, Stanford (CA)	B. Korte, Bonn
P.C. Fishburn, Florham Park (NJ)	B. Trakhtenbrot, Ramat Aviv
T. Ibaraki, Kyoto	

BOARD OF EDITORS

N. Alon, Ramat Aviv	R.M. Karp, Berkeley (CA)
D. Avis, Montreal (Que.)	J. Krarup, Copenhagen
C. Benzaken, Grenoble	T. Lengauer, St. Augustin
J.-C. Bermond, Sophia Antipolis	M. Lomonosov, Beer Sheva
K.P. Bogart, Hanover (NH)	L. Lovász, Redmond (WA)
E. Boros, Piscataway (NJ)	F. Maffioli, Milano
R.E. Burkard, Graz	C. McDiarmid, Oxford
V. Chvátal, Piscataway (NJ)	N. Megiddo, San Jose (CA)
D.G. Corneil, Toronto (Ont.)	R.H. Möhring, Berlin
D. de Werra, Lausanne	G.L. Nemhauser, Atlanta (GA)
S. Fujishige, Osaka	H. Noltemeier, Würzburg
F. Giannessi, Pisa	P. Pevzner, La Jolla (CA)
M.C. Golumbic, Ramat Gan	A. Prekopa, New Brunswick (NJ)
R.L. Graham, La Jolla (CA)	R.C. Read, Waterloo (Ont.)
P. Hansen, Montréal (Qué.)	F.S. Roberts, Piscataway (NJ)
F. Harary, Las Cruces (NM)	M. Saks, Piscataway (NJ)
P. Hell, Burnaby (B.C.)	A. Salomaa, Turku
A.J. Hoffman, Yorktown Heights (NY)	A. Schrijver, Amsterdam
S. Istrail, Rockville (MD)	M. Segal, Holmdel (NJ)
M. Iri, Tokyo	R. Shamir, Tel Aviv
G. Kalai, Jerusalem	Z. Wan, Beijing

EDITORIAL MANAGER Carolyn Sterner, New Brunswick (NJ)

Scope of the Journal

The aim of this journal is to bring together research papers in different areas of algorithmic and applicable discrete mathematics, as well as applications of combinatorial mathematics to computer science, OR and various areas of science and technology.

Contributions presented to the journal can be research papers, short notes, surveys, and possibly research problems. The "Communications" section will be devoted to the fastest possible publication of the brief outlines of recent research results, the detailed presentation of which might be submitted for possible publication in DAM or elsewhere. The journal will also publish a limited number of book announcements, as well as proceedings of conferences.

© The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper)

ELSEVIER

Amsterdam - London - New-York - Oxford - Paris - Shannon - Tokyo

© 2001 Elsevier Science B.V. All rights reserved.

This journal and the individual contributions contained in it are protected under copyright by Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science Rights & Permissions Department, P.O. Box 800, Oxford OX5 1DX, UK; phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.co.uk. You may also contact Rights & Permissions directly through Elsevier's home page (<http://www.elsevier.com>), selecting first 'Customer Support', then 'General Information', then 'Permissions Query Form'.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (+1)(978) 7508400, fax: (+1)(978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44)171 631 5555; fax: (+44) 171 631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

Except as outlined above no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Address permissions requests to: Elsevier Science Rights & Permissions Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Book announcements

Jesus Mario Bilbao

COOPERATIVE GAMES ON COMBINATORIAL STRUCTURES

Kluwer Academic Publishers, Norwell, MA (USA),

Dordrecht, the Netherlands, 2000, 344pp.

Table of Contents

- Chapter 1: Structures (games, graphs, matroids, and greedoids)
- Chapter 2: Linear Optimization Methods
- Chapter 3: Discrete Convex Analysis
- Chapter 4: Computational Complexity
- Chapter 5: Restricted Games by Partition Systems
- Chapter 6: Restricted Games by Union Stable Systems
- Chapter 7: Values for Games on Convex Geometries
- Chapter 8: Values for Games on Matroids
- Chapter 9: The Core, the Selectope, and the Weber Set
- Chapter 10: Simple Games on Closure Spaces
- Chapter 11: Voting Power
- Chapter 12: Computing Values with Mathematica
- Bibliography
- Index

Bernhard Korte and Jens Vygen

COMBINATORIAL OPTIMIZATION: THEORY AND ALGORITHMS

Springer, New York, NY, 2000, 530pp.

Table of Contents:

- Chapter 1: Introduction
- Chapter 2: Graphs
- Chapter 3: Linear Programming
- Chapter 4: Linear Programming Algorithms
- Chapter 5: Integer Programming
- Chapter 6: Spanning Trees and Arborescences
- Chapter 7: Shortest Paths
- Chapter 8: Network Flows

Chapter 9:	Minimum Cost Flows
Chapter 10:	Maximum Matchings
Chapter 11:	Weighted Matching
Chapter 12:	<i>b</i> -Matchings with <i>T</i> -Joins
Chapter 13:	Matroids
Chapter 14:	Generalizations of Matroids
Chapter 15:	<i>NP</i> -Completeness
Chapter 16:	Approximation Algorithms
Chapter 17:	The Knapsack Problem
Chapter 18:	Bin-Packing
Chapter 19:	Multicommodity Flows and Edge-Disjoint Paths
Chapter 20:	Networks Design Problems
Chapter 21:	The Traveling Salesman Problem

Nello Cristianini and John Shawe-Taylor
AN INTRODUCTIONS TO SUPPORT VECTOR MACHINES AND OTHER KERNEL-
BASED LEARNING METHODS

Cambridge University Press, New York, NY
2000, 189 pages

Table of Contents

Preface

Notation

Chapter 1: The Learning Methodology

- 1.1 Supervised Learning
- 1.2 Learning and Generalisation
- 1.3 Improving Generalisation
- 1.4 Attractions and Drawbacks of Learning
- 1.5 Support Vector Machines for Learning
- 1.6 Exercises
- 1.7 Further Reading and Advanced Topics

Chapter 2: Linear Learning Machines

- 2.1 Linear Classification
- 2.2 Linear Regression
- 2.3 Dual Representation of Linear Machines
- 2.4 Exercises
- 2.5 Further Reading and Advanced Topics

Chapter 3: Kernel-Induced Feature Spaces

- 3.1 Learning in Feature Spaces
- 3.2 The Implicit Mapping into Feature Spaces
- 3.3 Making Kernels
- 3.4 Working in Feature Spaces
- 3.5 Kernels and Gaussian Processes
- 3.6 Exercises
- 3.7 Further Reading and Advanced Topics

Chapter 4: Generalisation Theory

- 4.1 Probably Approximately Correct Learning
- 4.2 Vapnik Chervonenkis (VC) Theory
- 4.3 Margin-Based Bounds on Generalisation
- 4.4 Other Bounds on Generalisation and Luckiness
- 4.5 Generalisation for Regression
- 4.6 Bayesian Analysis for Learning
- 4.7 Exercises
- 4.8 Further Reading and Advanced Topics

Chapter 5: Optimisation Theory

- 5.1 Problem Formulation

- 5.2 Lagrangian Theory
- 5.3 Duality
- 5.4 Exercises
- 5.5 Further Reading and Advanced Topics

Chapter 6: Support Vector machines

- 6.1 Support Vector Classification
- 6.2 Support Vector Regression
- 6.3 Discussion
- 6.4 Exercises
- 6.5 Further Reading and Advanced Topics

Chapter 7: Implementation techniques

- 7.1 General Issues
- 7.2 The Naive Solution: Gradient Ascent
- 7.3 General Techniques and Packages
- 7.4 Chunking and Decomposition
- 7.5 Sequential Minimal Optimisation (SMO)
- 7.6 Techniques for Gaussian Processes
- 7.7 Exercises
- 7.8 Further Reading and Advanced Topics

Chapter 8: Applications of Support Vector Machines

- 8.1 Text Categorisation
- 8.2 Image Recognition
- 8.3 Hand-written Digit Recognition
- 8.4 Bioinformatics
- 8.5 Further Reading and Advanced Topics

APPENDIX A: Pseudocode for the SMO Algorithm

APPENDIX B: Background Mathematics

Instructions to Authors

All contributions should be written in English or French, should have an abstract in English (as well as one in French if the paper is written in French) and – with the exception of Communications – should be sent in triplicate to Nelly Segal, Editorial Manager, RUTCOR Rutgers, The State University of New Jersey, 640 Bartholomew Road, Piscataway, NJ 08854-8003, USA. The authors are requested to put their mailing address on the manuscript.

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

(see also <http://www.elsevier/locate/dam>)

No page charge is made.

Manuscripts submitted for the Communications section, having at most 5 typewritten pages, should be sent to a member of the editorial board in triplicate. Detailed proofs do not have to be included, but results must be accompanied at least by rough outlines of their proofs. Subsequent publication in this journal or elsewhere of the full text of a research report, the outline of which has been published in the Communications section of our journal, is not excluded. Every effort shall be made for the fastest possible publication of Communications. Consequently the presentation of these manuscripts should be very clear.

Please make sure that the paper is submitted in its final form. Corrections in the proofstage, other than of printer's errors, should be avoided; costs arising from such extra corrections will be charged to the authors.

The manuscript should be prepared for publication in accordance with instructions given.

1. The manuscript must be typed on one side of the paper in double spacing with wide margins. A duplicate copy should be retained by the author.
2. Special care should be given to the preparation of the drawings for figures and diagrams. Except for a reduction in size, they will appear in the final printing in exactly the same form as they were submitted by the author; normally they will not be redrawn by the printer. In order to make a photographic reproduction possible, all drawings should be on separate sheets, with wide margins, drawn large size, in India ink, and carefully lettered. Exceptions are diagrams only containing formulae and a small number of single lines (or arrows); these can be typeset by the printer.
3. References should be listed alphabetically, in the same way as the following examples:
For a book: W.K. Chen, *Applied Graph Theory* (North-Holland, Amsterdam, 1971).
For a paper in a journal: J. Rhodes and B.R. Tilson, Lower bounds for complexity of finite semigroups, *J. Pure Appl. Algebra* 1 (1971) 79–95.
For a paper in a contributed volume: M.O. Rabin, Weakly definable relations and special automata, in: Y. Bar-Hillel, ed., *Mathematical Logic and Foundations of Set Theory* (North-Holland, Amsterdam, 1970) 1–23.
For an unpublished paper: D. Allen, Relations between the local and global structure of finite semigroups, Ph.D. Thesis, University of California, Berkeley, CA (1968).

Instructions for LaTeX manuscripts

The Elsevier LaTeX package (including detailed instructions for LaTeX preparation) can be obtained from Elsevier's web site: www.elsevier.nl/locate/latex, or www.elsevier.com/locate/latex, or www.elsevier.co.jp/locate/latex, or from the Comprehensive Tex Archive, Network (CTAN). The Elsevier package consists of the files: `elsart.cls` (use this file if you are using LaTeX2e, the current version of LaTeX), `elsart.sty` and `elsart12.sty` (use these two files if you are using LaTeX2.09, the previous version of LaTeX), `instrauc.dvi` and/or `instrauc.ps` and/or `instrauc.pdf` (instruction booklet), `model-harv.tex` or `model-num.tex` (model files with instructions), `template-harv.tex` or `template-num.tex` (template files). To obtain the package from CTAN, use direct access via FTP at [ftp.dante.de](ftp://ftp.dante.de) (Germany), [ftp.tex.ac.uk](ftp://ftp.tex.ac.uk) (UK), or [ctan.tug.org](ftp://ctan.tug.org) (Massachusetts, USA) and go to the directory `/tex-archive/macros/latex/contrib/supported/elsevier`, or search for Elsevier with one of the CTAN search engines (<http://ctan.tug.org/CTANfind.html>), (<http://www.tex.ac.uk/CTANfind.html>) or (<http://www.dante.de/cgi-bin/ctan-index>). CTAN is a mirrored network of [ftp.tex.ac.uk](ftp://ftp.tex.ac.uk), [ftp.dante.de](ftp://ftp.dante.de) and [ctan.tug.org](ftp://ctan.tug.org), which are widely mirrored (see <ftp://ctan.tug.org/tex-archive/README.mirrors>) and hold up-to-date copies of all the public-domain versions of TeX, LaTeX, Metafont and ancillary programs.

The files should be mailed to: Log-in Department, Elsevier Science B.V., P.O. Box 2759, 1000 CT Amsterdam, Netherlands. E-mail: m.griffin@elsevier.com.

Mathematical Software Section

The section will consider papers falling in the same areas as DAM, and will essentially publish three kinds of contributions:

1. Regular papers, processed and accepted for their mathematical novelty, for which, in addition, the authors give and describe the corresponding computer codes.
2. Papers presenting significant implementations of algorithms from the literature, provided they are of particular interest to the scientific community. Criteria for acceptance of this kind of contribution will be: high efficiency, proved through extensive computational experiments, significantly improving that of the best existing codes (one order of magnitude is considered to be significant); novelty of the software, when no other code for the same problem is available to the public domain.
3. Papers presenting comparative studies on relevant existing software.

To submit their work, authors are requested:

- to mail three hard copies of the manuscript to Nelly Segal, Editorial Manager, RUTCOR, Rutgers University, P.O. Box 5062, New Brunswick, NJ 08903-5062, U.S.A., mentioning "Mathematical Software Section" in their covering letter and
- To send the codes electronically to Professors S. Martello and P. Toth at smartello@deis.unibo.it / ptoth@deis.unibo.it

Only source codes are considered. Accepted languages are FORTRAN and C. The codes must strictly conform to the ANSI 77 Standard FORTRAN and to the ANSI C Standard, respectively.

The codes must be clean, well documented and self contained. Use of machine-dependent constants and functions should be avoided or, when needed, clearly stated. Each code must contain a main subroutine or procedure which receives all the input data and yields all the output data as parameters. Such a routine must begin with a comments section providing:

- clear description of the domain of applicability
- meaning of each input and/or output parameter
- list of machine dependent constants and functions
- list of the routines composing the codes
- type of structure of all the parameters
- rules for the arrays dimensioning
- meaning of the main interval variables

Indentation is recommended for loops and if-then-else statements. The labels in each routine should be consecutive with constant step. Examples of well-structured codes can be found in Martello and Toth, "Knapsack Problems: Algorithms and Computer Implementations", Wiley, 1990.

Each code must be accompanied by a driver program which:

- defines the input data for one or more sample instances through assignment or input statements (in the latter case, the contents of the input records must be explicitly listed)
- calls the main routine of the code
- prints out the results on a standard unit. (The comments section of the driver program must provide the expected output.)

The codes will be available via a library managed by Elsevier Science through a Web-server at <http://www.elsevier.com/locate/dam>

Copyright in the articles is held, except where noted, by Elsevier Science. Copyright as well as other proprietary rights in the source code are held by the authors. By submitting the code along with the article, the authors have agreed to permit the readers of *Discrete Applied Mathematics* the right to use the algorithms for personal and professional research use, but not for any further redistribution, further sublicensing, or commercial use. All rights are otherwise reserved.

Subscription Information

Discrete Applied Mathematics (ISSN 0166-218X). For 2001 Volumes 107-115 are scheduled for publication. A combined subscription to Discrete Applied Mathematics and Discrete Mathematics (Vols. 226-241) at reduced rate is available.

Subscription prices are available upon request from the publisher. Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where air delivery via SAL is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, PR China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For all other countries airmail rates are available upon request.
